

# N62

## Smart Mini POS

Android powered All-in-one payment terminal, Flexible for Versatile Payment Solutions

**N62** is a Smart Mini POS terminal. Powered by Android 10 operating system and Quad-Core Cortex A53 processor, it supports versatile payment applications across various scenarios. With its sleek and elegant design, portable body, and compatibility, the **N62** is tailored for omni-channel payment environments. Offering extended battery life, superior wireless connectivity, and excellent reliability and scalability, the **N62** stands out with its exceptional performance and convenience.

## Compatible for unattended deployment

Using the Integrated payment module base transforms the N62 into an unattended payment terminal, supporting MDB, digital pulse, LAN, RS232 and USB. Opening new opportunities for use in vending machines, retail kiosks, amusements, access control, car washes and much more.
