

Coin Validator

Microcoin SP

Coin Validator

SP115 & SP155

Compact, high-speed,
feature-rich and stylish

The Microcoin **SP** coin acceptor is a high speed, multi-coin validator, capable of accepting coins up to 6 coins per second. It is packed with features including on-board programming. It can accept up to 12 different coins or tokens at speed without compromising the operation of the validator. Coupled with comprehensive software support packages, the Microcoin **SP** provides a modern solution which can be maintained in-house. The Microcoin **SP** has a mini or standard faceplate option (known as 115 & 155) which can either be illuminated or non-illuminated, offering a modern, stylish appearance to any machine.

SP115 with illuminated faceplate

SP155 with standard faceplate

Technical specification

Power Supply	12-24 Vdc regulated
Acceptance Rate	Up to 6 coins per second
Coin Diameter	17mm to 30mm
Coin Thickness	1.2mm to 3.3mm
Coin Output	10-way parralel connector (5x2) 6 parallel NPN open collector outputs
Pulse Width	Programmable
Interfaces	Pulse/Parallel/ccTalk/Accumulator
Environmental	Operating temp : 0C to 55C Storage temp : -10C to 65C Humidity : Up to 90% R.H., non-condensing
Programming	PC based SPTools software
